Mountain Weather Forecast

Yorkshire Dales National Park

Forecast valid from 06:00 on Monday 17 Aug 2020 until 23:59 on Tuesday 18 Aug 2020

Forecast Issued on Monday 17 Aug 2020 at 03:46

Confidence: High confidence for an unsettled period of weather, however confidence is low to moderate for extent and intensity of heavy showers and thunderstorms over the next few days. Confidence generally higher for the onset of some wet and windy weather towards the latter stage of this coming week.

Headline for Monday 17 Aug 2020: A grey and gloomy start, but brightening up with sunny spells and scattered heavy showers and thunderstorms.

Mountain weather hazards on Monday 17 Aug 2020

Blizzards No Likelihood	**Heavy Snow** No Likelihood	**Storm force winds** No Likelihood
Gales No Likelihood	**Severe chill effect** No Likelihood	**Poor visibility** High Likelihood
Thunderstorms Medium Likelihood	**Heavy persistent rain** Medium Likelihood	**Strong sunlight** Low Likelihood

Heavy Rain	Light rain	Drizzle	Heavy rain showers	Thunderstorm	Heavy rain showers (night)
Precipitation probability					
70%	40%	40%	60%	70%	60%

Forecast for Monday 17 Aug 2020

Weather: Heavy and perhaps thundery rain spreading northwards across the park first thing. Cloud will be low bringing extensive mist and fog, which will continue through the morning, although much of the rain will ease, aside from further light rain and drizzle for a time. During the afternoon, skies will brighten from the south allowing some sunshine to break through, however this could spark further heavy showers and thunderstorms. These will steadily ease during the evening giving a drier end to Monday.

Chance of cloud free mountain/hill tops above 600m: 0-10% until 13:00, with hill tops in the west and south most favoured for any breaks. Becoming 70-80% for most after 13:00 with southern and western parts of the park seeing the improvements first. Heavy showers and thunderstorms may occasionally cover tops in cloud.

Visibility: Often moderate or poor (in rain) and very poor <100m (in fog) until 12:00, where navigation will be difficult. Improving as skies brighten to become excellent 25km, but occasionally moderate or poor to just a few kilometres in heavy showers and thunderstorms.
